<b>Profit for the year</b>	<b>17,681</b>	<b>1.4</b>	<b>15,428</b>	<b>1.8</b>

Profit before tax was up compared to the previous year due to the performance of financial management which, within a context of significant development in average assets (which incorporated significant inflows from policies subject to revaluation since the beginning of the year), in any event achieved excellent levels of returns, safeguarding the company's expected levels of profitability.

However, it should be noted that, although the profit before tax at 31 December 2014 totalled €29,746 thousand and is only just above the €28,413 thousand recorded at the end of 2013, the latter benefitted from extraordinary income (net of expenses) of €4,536 thousand not present in 2014 as a result of the sale of non-current securities.

As at 31 December 2014, capital losses from the valuation of financial instruments (net of capital gains) amounted to €922 thousand while in 2013, also without applying the anti-crisis decree, the balance between capital losses and capital gains on financial instruments amounted to €230 thousand.

The key business ratios are provided below.

<b>Financial Statement Ratios</b>	2014	2013
Gross profit before tax / Total net reserves	0.71%	0.90%
Profit of the technical account / Total net reserves	0.58%	0.58%
Administration costs / Premiums net of reinsurance	0.45%	0.66%
Administration costs / Total net reserves	0.14%	0.18%
Constituting elements of the Solvency Margin / Solvency Margin to be formed	118.83%	135.74%

The profit of the technical account in relation to reserves is stable with respect to the past, as a result of the sustained growth in reserves and the corresponding increase in the resulting technical profitability.

The decrease recorded at pre-tax profit level per unit in total net reserves reflects, at the same time, the presence of extraordinary income of €4,536 thousand in the 2013 ratio cited above, which had increased the 2013 pre-tax profit given the same reserves.

In addition, the notable boost in premiums issued resulted in a considerable drop in the ratio between administration costs and premiums.

The constituting elements of the solvency margin / solvency margin to be formed ratio reflects the previous allocation to equity of the profit of the 2013 statutory financial statements and the increased capital requirement as a result of business and capitalisation for the year. The latter is primarily attributable to the increase in the requirement for segments I and V by around €24.9 million and for segment III by approximately €3.5 million. The surplus of

constituting elements of the margin over the margin to be formed is lower than last year (€24,675 thousand compared to €36,313 thousand), but it remains at adequate levels that are consistent with the development of the company's collections, also thanks to the capitalisation of the 2014 profit for the year.

Company expectations of further growth in terms of collections in 2015 have convinced the company to weigh up a capital strengthening plan. In addition to the planned strengthening to be carried out through a share capital increase by the majority shareholder, it was deemed more appropriate, also based on the streamlining of the company's equity structure in the medium-term (already subject to Solvency II legislation), to explore and implement the process targeted at the issuing of a subordinated loan. The company's Board of Directors meeting of 12 March 2015 confirmed the opportunity to permit an increase in the company's capitalisation, which will allow the company to operate with the necessary cautiousness and peace of mind, for which the higher and therefore more prudential limits than the legislative ones are also confirmed as appropriate and, to this end, confirmed the opportunity to weight up the possibility of issuing a bond, without prejudice to the sole shareholder Credito Emiliano S.p.A.'s willingness to carry out a share capital increase as an alternative.

## **12. INTERNAL CONTROL AND RISK MANAGEMENT**

### **Internal control**

In 2014, internal control activities were carried out by the Credemvita Internal Auditing Function.

This function has the duty of assessing the effectiveness of the internal control system and the need for updates, also by carrying out support and advisory activities for other company functions. This function's mission takes the form of periodic assessments of company processes, proposing corrective actions to remove any critical issues detected during the audits and the subsequent monitoring of their actual implementation.

In line with industry best practices, the audit method is based on a "risk based - process oriented" approach, which involves mapping the Company processes and identifying/assessing the relative risks, as well as identifying the control activities to be carried out on each of the risks identified.

The audit method is based on the following 4 models:

- the process model;
- the risk model;
- the risk and controls assessment model;
- the internal control system representation model.

On the basis of the foregoing, the Company processes were mapped and the relative risks were identified and assessed, making it possible to identify the areas to be audited by internal audit.

The process of mapping, preparing and updating checklists to support audit activities is dynamic and continuously enacted during planned audit activities.

## **Risk Management**

Credemvita S.p.A has adopted a strategy for undertaking and managing risk based on criteria of sound and prudent management, coherent with the company's level of capital. This strategy is based on risk assessment principles that consider aspects relating to the significance (impact on income statement) and probability of events.

Risk management strategy is substantially the set of values and behaviour that characterises the company's approach to risk, in all aspects of its business: from the formulation of business strategies to everyday operations. The risk management approach adopted therefore reflects the Company's values, influences its culture and its *modus operandi* and affects the way in which the elements of the risk management system are implemented. The way in which risks are identified, the type of risks undertaken and how these are managed are important components of the risk management system.

The risk management approach adopted, based on proportionality criteria, is conveyed through a specific policy (see "*Risk Management Policy*") based on the general principles outlined in IVASS Regulations nos. 20 and 36 (and subsequent updates), while specific documentation has been drawn up containing all of the relevant details (*risk appetite framework, investment policies, reference framework for risk profiling, risk registration procedure, etc.*).

Risk management and strategic decisions in general are taken on the basis of risk-based analysis, which enables the Company to optimise capital, improve company performance and mitigate reputational risk vis-à-vis contracting parties, the market and Regulators.

In 2014, work was undertaken to identify specific risk management processes aimed at mitigating risk factors and fine-tuning the methods adopted to identify, assess and control risk.

In light of European regulations on the preparation of financial statement items, which take a "fair value" approach and are supported by international accounting standards (IAS/IFRS), the Company has decided to adopt "market consistent" fair value measurement models for internal Risk Management assessments. Stochastic and/or deterministic valuation models are based on the joint valuation of assets and liabilities.

Furthermore, owing to the European solvency legislation (and now upcoming entry into force of the new Solvency II legislation on 1 January 2016), the Company started a process aimed at supporting the current and future evaluations of risks in line with the requirements of Pillar II of Solvency II.

The following activities were performed by the Risk Management Function for 2014:

- Fair Value of insurance assets and liabilities;
- Economic value of the various business lines and the Company total;
- Risk measurements on the separate management portfolios – based on the Solvency I approach;

- Analysis of the matching of assets and liabilities;
- Liquidity analysis;
- Analysis to check projected returns of the separate portfolios over a specific period of time;
- Analysis of sensitivity to the different risk factors;
- Stress Tests on the main sources of risk considered individually or jointly in a single scenario;
  - EIOPA 2011 Stress Test;
  - Joint Stress Test with the parent company.
- Risk analysis aimed at defining capital requirements compatible with a pre-established level of probability and a specific time horizon;
- Calculation of the Solvency II SCR;
- EIOPA 2014 Stress Test based on Solvency II legislation;
- Current and Prospective Risk Evaluation – FLAOR;
- Self-Assessment for the quantification of operating risk.

### **13. FURTHER INFORMATION**

#### **Personnel**

At the end of the period, there were exactly 44 employees.

During the year, eight staff members were seconded on a full or part time basis to Credemassicurazioni S.p.A. and Credito Emiliano S.p.A..

During the year, one staff member seconded from Credemassicurazioni S.p.A. and two staff members on temporary contracts also worked at the Company.

Training activities continued in order to enhance internal skills.

#### **Information Systems**

In 2014, ample attention was dedicated to activities relating to the process of IT adjustment into line with Solvency II: activities continued for the implementation of the company DataWareHouse and Pillar II and Pillar III reporting, the system in support of production of the FLAOR was fine-tuned and the control systems required by the different policies were implemented. In addition, a “Data Quality Management Plan” was drawn up which describes the process of achieving full compliance with the criteria established by the legislation regarding company data, and “Data Quality” processes and controls were designed which will be applied according to the regulations and which are currently in the process of being implemented.

In terms of document management, the IT platform which allows company processes to be automated with a “document and workflow management” system was rendered fully operational. This makes it possible to limit operating risks and ensure complete tracking of transactions. At the end of 2014, five processes were completed and an important implementation plan was defined which will also continue in subsequent years based on a collection of priority processes shared with Top Management.

Again in terms of documents, an outsourcing service was launched to manage, computerise and control a sizeable portion of the forms received from the sales network. The initiative made a dematerialised archive available, with the associated advantages.

The other main development projects involving this function were:

- the management of CPI products on the main management system and relative migration from the previous system;
- the definition and launch of a new product to cover the risk associated with pension-backed loans;
- the restyling of the Company’s website.

## **Organisation**

### **Governance Model**

In 2014, the Company's governance model was completed, by adjusting it into line with primary legislation and regulations, and the European directives, where applicable.

In particular, as part of the programme of convergence towards the new Solvency II regime (Directive 2009/138/EC), indications on the following were acknowledged: the governance system, including the risk management system, evaluation of the risk profile according to Solvency II principles and the obligations of disclosure to the national authorities. To this end, for each company domain, specific policies were defined by the administrative body, or adjusted if already existing, containing the following: strategies and objectives pursued, roles and responsibilities of the functions involved, and the processes and procedures to be applied.

### **Organisational Structure**

With a view to the continual improvement and constant adjustment of the organisational structure in line with the development of the business and reference context, a well-structured review of the Company's organisational structure has been planned for 2015. By means of this reorganisation, the Company intends to ensure an adequate alignment of the governance model defined as part of the Solvency II project, to promote a greater focus by certain functions on specific areas of activity and business, support the process of growth in company size and enhance the functional separation with reference to certain areas of activity. These activities will consequently involve an improvement in terms of the effectiveness and efficiency of company processes and greater coverage of risks.

## **14. FORECAST ON OPERATIONS**

The 2015 operating planning for Credemvita focuses on a net positive collection target of around €707 million, down compared to net business in 2014, equal to around €902 million, which, nonetheless, represented a peak result for the Company which cannot be repeated at present.

In particular, the decrease is attributable to the product mix which envisages a lower rate of growth in policies subject to revaluation in 2015, for which net collections of around €362 million are estimated, compared to €561 million in collections at the end of 2014.

However, despite the lower volumes forecast, also in 2015, Credemvita's offering for that type of policy will be inspired by its goal of achieving the utmost satisfaction of customer requirements while protecting and ensuring adequate returns on investments. Segment III policies are expected to achieve net collections of roughly €318 million, concentrated primarily on the Unit-Linked Credemvita Collection policy group launched in 2013, and supplemented by new types of policy in 2014 and which has catalysed and will continue to catalyse throughout 2015 the commercial activities of placement agents, which are expected to contribute around €391 million to the budgeted net collections target. For Credemvita, these policies constitute a new and highly innovative product concept within its Unit-Linked line, in which active financial management is provided for the reference portfolios selected by the customer with a view to enhancing fund performance. Active management has never before been offered on catalogue Unit-Linked policies.

This unique and complete product allows customers not only to select portfolios with the asset class most suited to their investment profiles, but also to add a series of correlated services to support policy performance, such as the Stop-Loss service (investment monitoring and limitation of losses during negative market trends) and Investment Plan (which provides the possibility of changing from the initial asset class to the customer's target asset class at periodic intervals).

Lastly, the collections indicated previously are augmented by around €27 million in collections from the pension fund and temporary policies for coverage in the event of death (both individual and collective), down compared to around €32 million in 2014, due to lower growth forecasts for the credit protection component).

In support of the aforementioned development, as an alternative to a share capital increase which the shareholder Credito Emiliano S.p.A. was, nonetheless, willing to carry out and indeed in line with the medium-term capital planning and the budget process, the Company started preliminary activities for requesting the prior authorisation from IVASS for the issuing of a subordinated loan, necessary for not only supporting the growth in volumes but for:

1. strengthening Solvency Ratios both in the short-term (Solvency I approach) and, especially, in the medium-term (Solvency II approach), in consideration of the dimensions the company has acquired over recent years (more specifically, it should be noted that total reserves of almost €5 billion are estimated at the end of 2015, compared to €2.6 billion at the end of 2012);
2. making it possible to benefit from greater elasticity in operating management given the same Risk Appetite defined by the Board of Directors, increasing the opportunities for potential growth in terms of both greater business and a different product mix, as well as providing the Company with an increased capacity for dealing with adverse market scenarios;
3. adequately plotting out the Company's path for the next three years, also making provision for a great deal of discontinuity which will be brought about by Solvency II.

The Company intends to immediately issue the bond loan in compliance with the eligibility requirements set forth in Delegated Regulation (Delegated Regulation - EU 2015/35 of Commission of 10 October 2014 which supplements Directive 2009/138/EC of the European Parliament and Council regarding access and exercise of insurance and reinsurance activities - Solvency II). In this regard, it should be considered that the Bond loan would be calculable both from a Solvency II legislation point of view (all with the characteristics set out, for this purpose, by the Delegated Regulation, as you can see in the paragraph below) and in terms of the current Solvency I legislation; the characteristics set out in art. 73 of the Delegated Regulation for the subordinated loans calculable in Tier 2 capital actually further accentuated the aspects of subordination and of absorption of the instrument's losses, also including all the characteristics currently envisaged in articles 44 and 45 of the Insurance Code.

Therefore, the loan will possess the necessary characteristics for inclusion:

- until 31 December 2015, in the available solvency margin of the Company up to a limit of 25% (of the lower value between the available margin and the required solvency margin), in compliance with articles 44 and 45 of the Private Insurance Code and art. 15 of IVASS Regulation no. 19 of 14 March 2008;
- starting from 1 January 2016, in Tier 2 capital for the coverage of an amount of no greater than 50% of the solvency capital requirement and no more than 20% of the minimum capital requirement, according to the provisions of art. 82 of Delegated Regulation (EU) 2015/35.

## **15. SIGNIFICANT EVENTS SUBSEQUENT TO YEAR END**

Between the close of 2014 and until the date of presentation of the draft financial statements under review, the activities targeted at issuing of the aforementioned subordinated loan are worthy of note in particular.

In fact, on 12 March 2015, the Board of Directors approved the issuing of the subordinated loan, as described above, which should take place in due observance of the legislative provisions and based on the appropriate prior authorisation from the Supervisory Authority.

To this end, said Board conferred an extensive mandate to the Chairman, Vice Chairman and the General Manager, including severally, to fulfil all necessary obligations for drafting the appropriate authorisation application and, subsequently, for issuing the loan, including through the convocation, where necessary, of the proper Board at which to adopt the definitive issuing decision according to the terms and formalities referred to in art. 2410, paragraph 2 of the Italian Civil Code and in compliance with the authorisation and provisions issued by the Supervisory Authority, following the transmission of the necessary application, as well as the signing of all necessary documentation to that end.

The application is expected to be sent to the Supervisory Authority by April 2015.

## **16. CONCLUSIONS AND PROPOSED ALLOCATION OF PROFIT FOR THE YEAR**

The financial statements have been prepared in observance of measurement principles and criteria compliant with the provisions established by the Italian Civil Code, Legislative Decree no. 173 of 26 May 1997, Legislative Decree no. 209 of 7 September 2005 and ISVAP Regulation no. 22. The Company's financial statements have been prepared on a going concern basis, taking into consideration its adequate level of capitalisation, which exceeds the minimum solvency requirements established by current regulations, and the forecast future results.

It is proposed that the profit for the year of €17,681,017 be allocated as follows:

- €884,051 to the legal reserve;
- €16,796,966 to the extraordinary reserve.

NOTES TO THE FINANCIAL STATEMENTS  
AS AT 31 DECEMBER 2014

## **FORM, CONTENT AND ACCOUNTING STANDARDS OF THE FINANCIAL STATEMENTS**

The financial statements for the year ended as at 31 December 2014, which include the Balance Sheet and Income Statement as well as the Notes, attachments and Management Report, have been prepared in compliance with the provisions pursuant to Legislative Decree 209/2005 and Legislative Decree 173/1997. The Balance Sheet and Income Statement have also been prepared on the basis of the provisions of ISVAP Regulation no. 22 of 4 April 2008. They were also prepared in line with the circulars and other provisions issued by the Supervisory Authority, special industry regulations and, when applicable and if not conflicting with the regulations referred to previously, the accounting standards of the Italian National Councils of Professional and Certified Public Accountants, the Italian Accounting Standard Authority, instructions provided by the national industry association ANIA.

Since the Company is authorised to operate exclusively in the Life segments, the attachments envisaged under ISVAP Regulation no. 22 of 4 April 2008 relating to the Non-Life segments have not been compiled and commented on. The Statements of the Credemprevidenza – Open-End Pension Fund (attachment B to these financial statements) have been prepared for each segment (secured bond, monetary, balanced and equity) and include the respective notes: these statements are accompanied by the Management Report (attachment A to these financial statements).

No special events took place that would require using the exemptions pursuant to article 2423, paragraph 4 and article 2423 bis, paragraph 2. Furthermore, when necessary, the risks and losses for the year are taken into account even if they were known only after year-end.

In compliance with the provisions of ISVAP Regulation no. 22 of 4 April 2008, cited above, these notes include the following parts:

- “A” Measurement criteria
- “B” Notes to the balance sheet and income statement
- “C” Further information.

The values reported in the financial statements are in euro, with no decimals, while the values reported in these Notes, including the relative attachments, are expressed in thousands of euro.

### **PART A - MEASUREMENT CRITERIA**

#### **Section 1 - Disclosure of measurement criteria**

The measurement criteria used to prepare the financial statements comply with the principle of prudent accounting and adopt the going concern assumption, and also take into account the economic function of the asset or liability element considered, on an accrual basis. In compliance with current regulations, no items have been offset. The accounting standards and measurement criteria adopted meet the objective of providing a clear, true and fair view of the Company's balance sheet, financial position and net result for the period, and are the same as those used for the previous year.

The measurement criteria acknowledge the amendments made to the Accounting Standards approved by the Italian Accounting Standard Authority, published on 5 August 2014 and applicable for financial statements for years ending as at 31 December 2014.

The standards and criteria adopted are described below for each financial statement item.

This report has been translated from the original version of Financial Statement in Italian.

This report has been translated into the English language solely for the convenience of international readers.

## INTANGIBLE ASSETS

### START-UP AND EXPANSION COSTS AND OTHER LONG-TERM COSTS

Intangible assets, considered to be for long-term use, are recognised at purchase cost inclusive of directly attributable accessory charges.

Intangible assets are recognised and amortised, with the consent of the Board of Statutory Auditors, based on their useful life, as established in art. 2426 of the Italian Civil Code. The following rates are used:

- 20% for software with a useful life of at least 5 years;
- 33% for other expenses of updating EDP procedures and software usage licences.

The abovementioned costs with long-term useful life are directly adjusted through amortisation.

If the net amount, calculated as noted above, exceeds the amount reasonably expected to be recovered in future years, the corresponding impairment is recognised. This amount is written back in subsequent years if the reasons for recognising the impairment are eliminated.

## INVESTMENTS

The breakdown between financial investments for long-term use and financial investments for shorter-term use complies with the criteria established by Board of Directors resolution of 16 December 2014 and the provisions set forth in ISVAP Regulation no. 36. In particular, the above-mentioned resolution establishes that fixed-rate debt securities used to hedge segment I and V products, with guaranteed capital and/or rates of return, and floating-rate debt securities with a residual life of at least 2 years at the trading date, with characteristics and residual life suitable to guarantee portfolio planning in line with the company's current and forecast economic and financial position, may be allocated to the long-term segment.

### CLASS C INVESTMENTS

#### INVESTMENTS IN FIXED-INCOME SECURITIES

##### *Financial investments for shorter-term use*

Listed fixed-income securities are measured and recognised at the lower of book value or market value at the date of year-end, calculated on the basis of the price on the last market day of the year. The book value is represented by purchase cost, calculated using the method of running weighted average cost by movement. This value is increased by the share of the issue spread for the year.

For implicit rate securities (zero coupon), the amount of capital appreciation for the year is recognised on an accrual basis.

Unlisted bonds are measured at the lower of the above-mentioned weighted average cost and the presumed realisable value at year-end inferred from the main contributors or, if unavailable, calculated with reference to listed securities with similar characteristics or on the basis of other objective elements.

Any write-backs are recognised within the limits of the write-downs recognised previously.

Derivative financial instruments are measured at presumed realisable value.

These notes specifically highlight the differences between book values and market values at year-end.

#### *Financial investments for long-term use*

Bonds are measured at purchase cost, calculated using the method of running weighted average cost by movement, in addition to the accrued issue spread and adjusted by the positive or negative trading spread for the year accrued at year-end close. These investments are written down at year-end in case of impairment. The write-down may be written back in subsequent years if the reasons for the impairment are eliminated.

For implicit rate securities (zero coupon), the amount of capital appreciation for the year is recognised on an accrual basis.

These notes specifically highlight the differences between book values and market values at year-end.

#### INVESTMENTS IN MUTUAL INVESTMENT FUNDS AND SICAV

Mutual investment funds and SICAVs, recorded in the segment of financial investments for shorter-term use, are valued at the lower of the book value recognised in the accounts and the year-end value disclosed by the manager. The book value is represented by purchase cost, calculated using the method of running weighted average cost by movement. For these securities, any write-backs are recognised within the limits of the write-downs recognised previously.

#### CLASS D INVESTMENTS (INVESTMENTS BENEFITING LIFE POLICYHOLDERS WHO BEAR THE RISK AND FROM PENSION FUND MANAGEMENT)

The value of class D investments covering contracts pursuant to art. 41 of Legislative Decree 209/2005 is determined on the basis of the current value expressed on the last transaction day of the year, as officially communicated by the issuing entities on the basis of their valuation and, for listed securities, adopting the values expressed in the reference market.

Securities and units belonging to class “D” investments are considered investments not destined to remain part of the company’s assets in the long-term.

#### TECHNICAL RESERVES ATTRIBUTABLE TO REINSURERS

The company reinsures part of the premiums issued (relating to “pure risk” contracts) with:

- Munich Re for reinsurance services regulated by a “surplus share proportional treaty in relation to risk premiums” and by a “surplus proportional treaty in relation to pure single premiums”;
- RGA for reinsurance services regulated by a “quota share proportional treaty in relation to pure single premiums” for coverage in the case of death.

Technical reserves attributable to reinsurers are recognised for claims subject to reinsurance, applying the conditions of the agreements.

#### RECEIVABLES

Receivables are recognised in the financial statements at presumed realisable value.

#### OTHER ASSET ITEMS

##### TANGIBLE ASSETS AND STOCK

Tangible assets are recognised at purchase cost inclusive of directly attributable charges. The value of these assets, calculated as noted above, is systematically depreciated based on the remaining useful life. Depreciation is calculated using rates meant to represent deterioration for the year. The rates adopted, which also meet fiscal criteria, are the following:

- 12% furniture and ordinary office machines
- 15% fixtures
- 20% electronic office machines
- 25% vehicles

Ordinary maintenance and repair costs are allocated to the income statement in the year in which they are incurred.

Stock, especially printed materials and consumables, is fully expensed during the year for prudent valuation purposes.

Please note that monetary and economic revaluations or exemptions pursuant to articles 2423 and 2423 bis of the Italian Civil Code have not been applied and that the company has no assets previously subject to revaluation pursuant to Law no. 72 of 19 March 1983.

#### CASH AND CASH EQUIVALENTS

Cash and cash equivalents are recognised at their actual nominal amount.

#### ACCRUALS AND DEFERRALS

Accruals and deferrals are calculated and recognised in accordance with the accrual principle.

#### GUARANTEES, COMMITMENTS AND OTHER MEMORANDUM ACCOUNTS

These are recognised in the financial statements at the equivalent value of the commitments assumed and guarantees given. The amounts of securities deposited with third parties are calculated at book value.

#### TECHNICAL RESERVES

##### *Mathematical reserves*

These are calculated specifically for each contract using technical actuarial techniques in line with the provisions set forth in ISVAP Regulation no. 21 of 28 March 2008, and are sufficient to cover commitments assumed in relation to policyholders.

Mathematical reserves are valued based on pure commitments, in line with the commitments assumed by the Company pursuant to the Special Conditions of the individual rate types and revaluation criteria, for types that are part of separate management.

To calculate the mathematical reserves, the recurrent method is used for rates for benefits subject to revaluation and the prospective method is used for rates for coverage in the event of death and outlined in the report of the appointed actuary.

##### *Additional reserves for financial risk*

To determine the value of the additional reserve for guaranteed interest rate risk for the individual separate portfolios and, within these, for each level of financial guarantee given on the contracts, the Company has determined the current and expected return for each separate portfolio in compliance with the provisions pursuant to Section II, Chapter II, Title V of ISVAP Regulation no. 21, and by applying the calculation principles and methods pursuant to Section III, Chapter II, Title V of the same Regulation no. 21.

##### *Additional reserve for demographic longevity risk*

For immediate life annuity contracts with first-order demographic bases, an additional reserve has been recognised for demographic risk in compliance with Section II, Chapter III, Title V of ISVAP Regulation no. 21.

##### *Reserves for amounts to be paid*

The reserves for amounts to be paid take into account the capital to be paid for all contract payments pending at year-end for surrenders, claims and maturities, in compliance with article 36, paragraph 3 of Legislative Decree 209/2005.

##### *Other technical reserves: reserve for future expenses*

The other technical reserves mainly consist of reserves for future expenses, calculated contract by contract on the basis of the management cost loading envisaged for the individual rates. In particular, the methods for calculating the reserve for future expenses are described in section 10 of these Notes.

#### *Additional reserve for demographic mortality risk*

For rates for Temporary Coverage in the event of death, an analysis using second-order development assumptions was conducted in order to verify a realistic coverage of the risks assumed by the Company. This analysis was conducted on contracts existing at the reporting date, broken down by Individual and Group rates.

#### *Technical reserves included in class “D” under liabilities*

For contracts under which the investment risk is borne by policyholders, in compliance with art. 41, paragraphs 1 and 2 of Legislative Decree 209/05, the mathematical reserves correspond to the market value of the relative assets allocated for coverage purposes included in class “D” under assets.

### **PROVISIONS FOR RISKS AND CHARGES**

Provisions for risks and charges are used to cover losses or payables the nature of which is known and which are certain or likely to exist, but for which the amount or the date on which they will arise are unknown.

### **PAYABLES**

Payables are recognised at nominal value.

### **PROVISION FOR EMPLOYEE TERMINATION INDEMNITIES**

This represents the liability at year-end to all employees. It is calculated in compliance with article 2120 of the Italian Civil Code, Legislative Decree no. 47 of 18 February 2000 and collective labour agreements in force, taking into account the years of service of each employee and the wages earned.

As of 1 January 2007, the rules laid out under Legislative Decree no. 252 of 5 December 2005 came into force.

As a result, employees had until 30 June 2007 to choose whether to transfer their severance pay to a supplementary pension plan. Subsequently, beginning on 1 July 2007, the silent consent mechanism came into effect entailing the automatic transfer of severance pay to a supplementary pension plan for all workers who had not indicated otherwise, or to the INPS fund if they had.

### **PREMIUMS AND ADDITIONAL CHARGES FOR THE YEAR**

Premiums, inclusive of additional fees, are accounted for on an accrual basis regardless of the date on which they are actually collected.

### **ACQUISITION COMMISSIONS**

Acquisition commissions are recognised in full during the year.

### **INCOME AND CHARGES**

These are recognised in the Income Statement in accordance with the principle of prudence and the accrual principle.

### **CURRENT, DEFERRED AND PREPAID TAXES**

Current income tax due for the year is calculated in compliance with tax laws in force, on the basis of a realistic and prudent estimate of total taxable income. This charge is recognised in the income statement on an accrual basis, and has a balancing entry under “Payables for other taxes”.

Deferred tax assets and liabilities are recognised in the income statement as an adjustment and/or addition to “Income taxes for the year” with a balancing entry, respectively, under “Other receivables” and/or “Tax provisions”.

Deferred tax liabilities and assets are calculated based on the tax rates in force in the year in which the repayment occurs. The provisions of accounting standard no. 25 and the principles of prudence established in art. 2423 bis of the Italian Civil Code were observed for the allocation of deferred tax assets.

In fact, deferred tax assets are recognised only if there is a reasonable certainty that taxable income of at least the total amount of the correlated positive tax effects will be generated in the years in which such effects are produced.

Deferred tax liabilities are recognised only if prerequisites for translating the latent tax charge into an actual tax charge are met.

#### FOREIGN CURRENCY TRANSLATION

Items in foreign currency are translated in compliance with OIC 26.

#### TRANSFER OF THE SHARE OF PROFIT FROM INVESTMENTS

According to attachment 11 of ISVAP Regulation no. 22 of 4 March 2008, a share of profit from investments is transferred from the technical account to the non-technical account.

### **PART B - NOTES TO THE BALANCE SHEET AND INCOME STATEMENT**

The company is authorised to operate in the life segments. Therefore, it is not required to prepare separate balance sheets relating to the non-life and life segments, or to break down the result for the year between the non-life and life segments.

In accordance with art. 2427 of the Italian Civil Code, the amounts of the asset, liability and income statement items are described along with the changes that took place during the year and the information required for the individual items.

The values referred to within the individual items are expressed in thousands of euro.

## BALANCE SHEET - ASSETS

#### Other long-term costs (item B.5)

Other long-term costs are mainly for usage licences and the associated customisations.

The item “Receivables pursuant to D.L. 209/02 relating to technical reserves” includes a €59,811 thousand tax credit on mathematical reserves, due pursuant to Decree Law of 24 September 2002, converted with amendments by Law no. 265 of 22 November 2002, net of uses during the year. The rate of 0.45% expected for the year 2014 was used to calculate the increase for the year in the receivable pursuant to Decree Law 209/02. The increase in this receivable is associated with the increase in the mathematical reserves for the year 2014, calculated for that purpose according to the methods established in the cited regulations. This receivable is recovered by subtracting it on a case by case basis from withholding tax and substitute tax payments calculated at the time of disbursement of capital returns to be paid on the basis of the relative insurance contracts. An additional possibility to recover that receivable was introduced beginning in 2007 by Decree Law 168/2003, when the total amount of the above-mentioned substitute and withholding taxes to be paid each year is lower than the tax on reserves paid for the fifth previous year. In that case, the difference may be fully or partially offset against taxes and contributions pursuant to article 17 of Legislative Decree no. 241 of 9 July 1997, also beyond the limit established in article 34, paragraph 1 of Law no. 388 of 23 December 2000.

In 2014, advance payments of €448 thousand were made for IRAP and of €996 thousand were made for IRES.

The item “Receivables for retrocessions on commissions” includes receivables for management commissions recognised to the Company by management companies and UCITS present in the portfolio, on the basis of specific agreements: part of such commissions is then returned to policyholders.

The item “Withholdings on SICAV income” includes the equivalent value of advance withholding tax on income from sales of SICAVs.

The IRES receivable of €664 thousand is the residual credit from the Unico tax return statement for the previous year. The IRAP receivable of €1,008 thousand derives from credit balance from the 2014 IRAP statement.

Some of the receivables shown above relate to transactions with shareholders or their associates or subsidiaries. The details are provided below.

## Section 9 - Subordinated liabilities

The company has no liabilities with subordination clauses.

## Section 10 - Technical reserves (items C.II. life insurance business)

Please refer to attachment 14 for information on changes during the year in components of the mathematical reserves (item C.II.1). As at 31 December 2014, the additional reserve for financial risk and the additional reserve for demographic risk amounted to €7,215 thousand and €15 thousand, respectively.

The Reserve for amounts to be paid (Item C.II.3.) amounts to €22,553 thousand: the relative breakdown by segment is provided below.

Description	Segment I	Segment III	Segment V	Segment VI	Total
Reserves for amounts to be paid	12,852	9,124	162	415	22,553
<b>Total Item C.II.3.</b>	12,852	9,124	162	415	22,553

Item C.II.5. “Other technical reserves” comprises the reserve for future expenses, the breakdown of which is provided below by segment.

Description	Segment I	Segment III	Segment V	Total
Reserves for future expenses pursuant to art. 25, par. 8, Leg. Dec. 174/95	11,501	246	14	11,761
<b>Total</b>	<b>11,501</b>	<b>246</b>	<b>14</b>	<b>11,761</b>

The reserves for future management expenses, which as shown in the table above amount to €11,761 thousand, were calculated on a prospective basis according to the first-order technical bases and with the amortisation set forth in the Technical Reports on rates. For some rates in the portfolio, as set forth in the Systematic Communication, no expense reserve is allocated since such expenses are financed by annual commissions on the returns of separate management portfolios. For immediate life annuities, the expense reserve is calculated by multiplying the loading percentage established for the annuity disbursement service by the amount of the mathematical reserve calculated at the reporting date.

For annual premium rates and when necessary for single-year rates, when calculating the reserves for future expenses the carrying forward of the management cost loading relating to the last premium paid or premium fraction is taken into account.

For segment III and VI rates, a prospective analysis using second-order development assumptions was conducted in order to verify a realistic coverage of the expected requirement to meet the Company’s future expenses. Based on the second-order analysis, it is not necessary to allocate any reserve for future expenses.

<b>Total</b>	<b>1,275,899</b>	<b>100.0</b>	<b>852,744</b>	<b>100.0</b>	<b>423,155</b>

Collections of around €1,275,899 thousand break down into 57% (€730 million) for segment I and V contracts subject to revaluation, an aggregate that has increased considerably (+49% compared to the same period of 2013), around 40% for linked products (€504 million), exclusively relating to Unit type contracts (+54% compared to the previous year, which closed with premiums issued of €328 million), and around 2% of the total for the Pension Fund (€26 million), up by approximately 31% compared to the previous year; the remaining €14 million refers to temporary contracts for coverage in the event of death, up by around 9% compared to the previous year.

In the year 2014, segment I contracts subject to revaluation followed a dynamic trajectory due to significant cash flows from “Investire Sicuro” family contracts, for which the Company recognised a guaranteed minimum rate of 2.00% for 2014. This rate, which exceeded equivalent market returns for the period, combined with the guarantee on invested capital, enabled Credemvita to support the development of contracts subject to revaluation with customers of the placement agent Credito Emiliano, precisely at the time of sustained and growing demand from customers for these type of contracts.

In 2014, Credemvita enriched its segment I offering with the products Investire Sicuro Reserved, Investire Sicuro Crescita and Investire Sicuro Private, which, together collected €177 million in premiums; in addition, the Credemvita contract Collection Private was launched at the end of the year in segment III, which collected €19 million in premiums; in addition, the collection of premiums on the Collection products launched in 2013 continued at steady rates (premiums of €389 million).

The table below reports premiums issued linked to the new rates, compared with total collections for the year.

The item “Commission retrocessions on contracts linked to external funds” refers to commissions due to policyholders with reference to Unit-Linked products linked to external funds. The decrease compared to last year was due to the decrease in reserves relating to linked contracts and external funds which entail that retrocession of commissions to policyholders.

“Maintenance commissions” accrued with respect to placement agents (primarily Credito Emiliano S.p.A.) constitute the part of management commissions recognised to the networks deriving from linked products for €13,571 thousand,

segment I products for €12,164 thousand segment III products and for €976 thousand segment VI products (pension funds). The increase compared to last year is mainly due to the increase in reserves relating to those product types.

#### **Share of profit from investments transferred to the non-technical account (item II.12)**

The share of profit from investments is calculated and transferred from the technical account to the non-technical account in compliance with ISVAP Regulation no. 22 of 4 April 2008 - Attachment 11. According to that regulation, the share of profit to be transferred is the amount of income from investments recognised in the technical account net of the amount of financial and borrowing costs recognised in the same technical account, applying the ratio between the semi-sum of net technical reserves for the year and the previous year and the semi-sum of shareholders' equity for the year and the previous year. Unrealised income and capital gains as well as unrealised financial and borrowing costs and capital losses relating to investments deriving from assets recognised in class D in the Balance Sheet have been excluded. The share transferred from the life technical account to the non-technical account amounts to €6,244 thousand.

Only transactions on derivatives existing at the date of the accounts that involve commitments for the Company must be stated. If the contract does not correspond precisely to the figures described or in the case in which it is characterised by elements of several types, it must be stated in the closest contractual category. Offsetting of items is not permitted except in relation to purchase/sale transactions relating to the same type of contract (same content, expiry, underlying assets, etc.).

Contracts that envisage swapping of two currencies must be indicated once only referring, by convention, to the currency to be purchased. Contracts that envisage interest rate and currency swaps must be indicated only under contracts on currency. Interest swap derivatives are classified conventionally as "purchases" or as "sales" according to whether they involve the purchase or sale of the fixed rate for the insurance company.

(1) For derivative contracts that involve or may involve the exchange of capital at term the settlement price of these must be indicated; in all other cases, the nominal value of the reference capital must be indicated.

(2) Indicate the fair value of derivative contracts;
